STEAM Workgroup, an independent research and evaluation company in Indianapolis, Indiana, is conducting a study to learn about perspectives on evaluation in informal learning contexts. You are receiving this invitation because you use, read, and/or have an interest in evaluation studies.

This survey will take about 10-12 minutes to complete, and a progress bar will be visible at the bottom of the screen. **The survey works with all modern browsers, but it will not work with Internet Explorer.** It will be easiest to complete the survey on a laptop, desktop, or large tablet. The main part of the survey involves sorting statements into three groups:

- statements with which you agree
- statements with which you disagree
- statements that are neutral

This survey asks that you prioritize and make decisions about these statements. This could mean that, in your view, there may not be "enough" room on parts of the chart for certain statements. This is by design, and this is what makes the survey meaningful. **All statements should be read with your context in mind - your experiences, your organization, and your views.** In other words, there are no right or wrong answers here.

**No personally identifiable information will be collected, and your organization will not be identified in or through your responses.** Because of the anonymous nature of the survey, you will not be able to save your progress so please complete the survey in one sitting.

Please take the survey at [https://steamworkgroup.com/value](https://steamworkgroup.com/value)

If you have concerns or questions about this study, please contact STEAM Workgroup *(voe_project@steamworkgroup.com)*.

Thank you for sharing your thoughts and perspectives!
